INDUSTRY OVERVIEW

Top Five Post Recession Consumer Shopping Trends For 2010

- 1) **RESTRAINT REMAINS THE NEW NORMAL:** Unemployment and economic issues have slowed American's confidence to return to past shopping behaviors
- 2) **VALUE IS A TOP PRIORITY:** Shopper focus on low prices at the expense of all other variables threatens margins
- 3) **STORE BRAND GROWTH CONTINUES:** Unit share growth continues and retailer focus has never been stronger
- 4) **GROCERY CONSOLIDATION INTENSIFIES:** Struggling local and regional players will become acquisition targets while national retailers could divest unprofitable formats and banners
- 5) **ASSORTMENT WARS ESCALATE:** Retailer efforts to simplify the consumer shopping experience by eliminating aisle and shelf clutter will impact 2nd and 3rd tier brands.

An approach to...

CATEGORY MANAGEMENT

Sophistication In The Market

Strong demand in the market to be more “fact-based” in the decision-making process.

“Tell me something I do not know” is the mantra of some, but much harder to do than ever before.

Relationship selling has been successful but the new environment is focused on performance metrics (inside and outside the retailer).

Complex and competing demands for vital shelf space (margin, share, traffic, limited assortment) are challenging the “reason to exist” in the category.

According to Spectra Demographics, the Glory Foods consumer is typically:

- Higher Incomes
- Middle Aged
- Larger Households with Children
- Higher Education
- Principle Lifestyle Ranges from Moderate to Cosmopolitan

These demographic metrics show that Glory Foods is a **valuable shopper** as they tend to be more affluent with larger families than either Margaret Holmes or Allens.

On a Total US basis, Glory Foods demonstrates significant retailer partnership value because:

- Significantly higher Brand Loyalty than Allen's and Margaret Holmes brands
- Higher dollars spent per buyer/dollars spent per occasion.
- Higher Basket Size
- With their solid baseline and price position, they become a partner who delivers profit!

FINAL THOUGHTS

CLOSING REMARKS

Closing Comment

- Visionary Quotes:
 - He says that the category management team's vision is all about "understand(ing) the value of data and embraces technology as central to the kind of *fact-based decision making that drives not only category management, but the business as a whole*".
- Three drivers to the business:
 - "More and more retailers and suppliers have been focused on gaining an increased level of shopper and consumer insights".
 - *"Organization that can get out of the 'hunting and gathering' mode and into the insights delivery mode will be the winners"*.
 - "At the end of the day, the best plans are inconsequential without execution".

COVER STORY

Visionaries

2007

JOE PATTI, VP, Retail Planning & Category Management, National Retail Sales, talks about the evolution of the shelf at Anheuser-Busch

Pictures of you are led by "visionaries" who are not just in the business, but are the business. Joe Patti, vice president, Retail Planning & Category Management, National Retail Sales, for Anheuser-Busch, is one of those visionaries who has helped shape the category management team's vision of fact-based decision making that drives not only category management, but the business as a whole.

He points out that the category management team's vision is all about "understand(ing) the value of data and embraces technology as central to the kind of fact-based decision making that drives not only category management, but the business as a whole".

He gives a lot of the credit to the incorporation of Anheuser-Busch's category management efforts over the years. "We have a long history of category management efforts at retail," he says. "We have a long history of category management efforts at retail," he says. "We have a long history of category management efforts at retail," he says.

When he first started in 1988, only three people were in the category management team. Today, the team has grown to over 100 people. "We have a long history of category management efforts at retail," he says. "We have a long history of category management efforts at retail," he says.

SOLUTION SYSTEMS

Patti recognizes that technology is a key component to supporting the vision and goals of an organization, and he believes that technology is a key component to supporting the vision and goals of an organization. "We have a long history of category management efforts at retail," he says. "We have a long history of category management efforts at retail," he says.
