As a results-driven sales and business development executive with over 11 years of experience accelerating revenue and building high-performing teams, I was excited to learn of this opportunity. Throughout my career, I have consistently delivered exceptional growth in competitive markets across CPG, retail, digital marketing, c-suite stakeholders, logistics, production, IT, Tech, Pharma, Health, Medical, Bio-science, Hospitality, Data, Internet /e-commerce, social media marketing, equipment, communications, SaaS, Financial and professional services. Recently, as President of Zebra3 Business Performance Consulting, I averaged +27% annual sales growth across 13 clients. Notable wins include scaling Belle Chevre from \$1M to \$8M in only 8 months by securing placements with Publix, HEB, Walmart, and Kroger, and generating +\$5M in new revenue for Texas A&M University's Executive Crisis Training Curriculum I also launched digital loyalty programs that produced +\$2M in incremental online sales while tripling customer engagement.

Earlier in my career, I drove transformative results at scale. At Cott Beverages, I increased Walmart's market share from 7% to 33% in 2.5 years and grew the Grocery Division from \$175M to \$250M in two years. As VP of New Business Development at Catalina Marketing, I delivered \$200M in incremental revenue (+30%) by securing Tier 1 retail accounts and pioneering shopper marketing innovations with Target and Walmart. Built new businesses from scratch in every role I have served. In doing so, compiled a list of prospects and connected and sold. In conventional businesses, I created new unconventional business units. At both Coca-Cola and Cott, I carved out and resurrected retired product lines to sell to smaller, localized distributors. At Catalina Marketing, I took big chain loyalty and shopper reward programs to convenience stores, a new channel. Each time, I started cold calling on accounts having no previous contacts, assembled proposals and generated more profitable, significantly sized revenue. Here are some AV results generated in first 3 months of execution:

\$1MM in all new small distributor sales at Coke and \$2.5MM at Cott. Catalina sold the unit as a company after a year of scaling for a rich, undisclosed amount. Health insurance where I'm still doing it, produced \$1MM annualized volume that is now \$1MM per week.

Social media packages contributed incremental start fees of \$1MM in the first 3 months and an AV of \$5MM. E-commerce kits after 3 months yielded \$3MM AV in new business for private equity investors, and have now implemented AI (with human check-points) improving sales productivity..

These, I established as sole operator, then scaled up, adding people or appending to existing personnel. Further accelerated sales by setting up social media campaigns, e-commerce access, affiliate and influencer marketing and CRM implementations adding incremental revenues averaging +22%. My approach combines strategic vision with relentless execution. I excel at building enterprise relationships, optimizing Salesforce and go-to-market strategies, developing talent, and turning complex challenges into measurable revenue gains. Whether leading cross-functional teams through acquisitions or helping venture-backed companies scale rapidly, I focus on "right-tracking" execution to deliver sustainable growth and profitability.

I am enthusiastic about bringing this track record of revenue acceleration and leadership to your company and welcome the opportunity to discuss how my experience will contribute to your growth objectives.

Thank you for your consideration. I look forward to speaking with you soon.
